

The North American Pen

Project Outline:

The Purpose of this project is to create a field guide that detailed everyday objects. The nature of a field guide is to take a group of objects that are generally the same thing and to categorize them by the subtle details that define them.

Artist Statement:

In this field guide I will explore the prevalent North American Pen. A pen is something that we use every day. What we tend to over look is the diverse population of pens that exists in our world. This field guide explores just one collection of pens found on my desk. We will take a scientific look at these pens which represent the diversity present in the pens of the rest of the world.

Line Sample

Brand:
BIC

Height:
5.5 in.

Diameter:
.25 in.

Cap Length:
2.5 in.

Components:
Cap, Body, Cartridge.

Ink Color:
Blue

Body Color:
White

Cap Color:
Blue

Features:

The BIC round stic is the classic iteration of the species. It is a very efficient pen with its large ink supply and small body construction.
